## End of Life Notice: Satrak Devices and Online Services

Trackunit is announcing the End of Life (EOL) for all legacy Satrak devices and online services, effective June 30, 2026. This marks a 12-month transition period during which Trackunit will support your migration to our next gen IoT telematics devices designed to enhance fleet visibility, compliance, and uptime across construction operations.

### Scope of Satrak EOL

The following devices and services will be decommissioned as of June 30, 2026:

#### Devices:

- AT100
- AT200 BSC
- AT200 STD
- AT210
- Teltonika units

#### Online Services:

- Plantview
- Fleetview

After this date, no support, updates, or connectivity will be available for these devices and services.

### Impacts and Recommended Actions

To avoid disruptions, Trackunit recommends customers immediately switch to the TU700 Raw telematics device and the K300 Pass keypad and will support you with your transition efforts to minimize disruptions. Please contact your Trackunit representative to plan your transition.
